

**Purpose:** The ROADS Trial will test the effectiveness of EHR-enabled stewardship clinical decision support for pediatric respiratory illness.

### What are the tools?

- **Respiratory Dashboard:** Consolidates relevant patient information and decision-making resources.
- **Stewardship Advisor:** Tailored support for efficient, evidence-based antibiotic decision-making.

#### Respiratory Dashboard

Vital sign and respiratory support trends

Diagnostic and therapeutic interventions

Integrated timeline

**Respiratory Dashboard Tab**  
ED and Inpatient

#### Stewardship Advisor

Resource links

Curated clinical documentation

Historical data (e.g., microbial cultures, immunizations)

#### Order Set

### Where do I find them?

**Non-interruptive BPA**  
Embedded in Storyboard, ED Trackboard, ED Navigators, Inpatient Navigators

### How do I use them?

- The tools will **not** be viewable for all respiratory illness encounters during the trial.
- When available, use at your discretion. They are designed to support (not restrict or replace) medical decision-making.
